Assessors.

The Sub-Deans of the Faculties :—

Arts : J. F. Lockwood, M.A., Ph.D.	1940
Medical Sciences : W. H. Newton, M.D., D.Sc.	1940

The Tutor to Women Students :—

Edith Goodyear, B.Sc.	1926

† Fellow of the College.

§ The dates given in the case of Professors are those in which they were appointed to their respective Chairs : in the case of others, the dates are those in which they were appointed members of the Professorial Board.

* Selected by ballot for membership during the Session 1939–40. (College Statute 24 (5), Regulation 29.) Membership to be continued for the duration of the War.

ADMINISTRATIVE STAFF.

Provost.

D. R. Pye, C.B., M.A., Sc.D., F.R.S.

Secretary.

E. L Tanner, M.A., A.C.A., A.I.A.

Assistant Secretary.

B. G. Greig.

Accountant.

W. Armstrong, A.C.A.*

Registrar.

H. E. Foster, M.A., F.Z.S.

Secretary's Office.—Superintendent of Records and Private Secretary to the Provost.—O. V. Lawley. Senior Clerk.—R. L. Gregory.* Alumnus Secretary.—Millicent M. Oldham.* Private Secretaries.—Dorothy C. Boalch, Betty M. Baker, B.A. Confidential Clerk.—J. W. Hunt.* Telephone Operator.—Louisa Sansom.* Deputy Telephone Operator.—Violet D. Hawes.* Clerk.—W. N. Pickford.*

Accounts Office.—Assistant Accountant.—F. H. J. Davidson. Accounts Assistants.—R. Chappell,* L. J. Gue,* C. Kent, W. H. F. Nicholls.* Clerks.—J. Nokes,* H. J. W. Feasey,* N. C. Shrubb.*

Registrar's Office.—Deputy Registrars.—E. Muriel Jukes, B.A.,* Winifred Radley. Confidential Clerks.—Mary Bartle, Lily Cooper, Nina W. Davis, Beatrice E. How, Dorothy M. Lloyd, Irene H. Morgan, Evelyn Morrell, Nancie L. Pank.*

Cashier.—H. Marklew.* Assistant Cashier.—J. H. Nicholls.

Comptroller of Chemistry Stores.—H. J. Evans, B.Sc. First Assistant.—P. W. Slater.* Second Assistant.—J. S. Challis.*

Establishment Officer.—(*Vacant*).

Publications Secretary.—(*Vacant*).

Steward of the Refectory.—R. Noel Small, B.A. Assistant Steward.—E. Irene Venables.

Superintendent of Buildings.—A. H. Taylor. Clerical Assistant—Winifred a'Brook.

Honorary Sanitary Adviser.—M. E. Denafield, M.B., B.Ch., D.P.H.

Auditors.—Messrs. Price, Waterhouse & Co.

* Absent on National or other Service.

ACADEMIC STAFF HOLDING ADMINISTRATIVE APPOINTMENTS.

Senior Tutor.
D. O. Wood, M.Sc.

Tutor to Women Students.
Edith Goodyear, B.Sc.

Faculty Tutors.

Tutor to Arts Students.—J. F. Lockwood, M.A., Ph.D.

Tutor to Laws Students.—Professor G. W. Keeton, M.A., LL.D.

Tutor to Science Students.—D. O. Wood, M.Sc.

Tutor to Engineering Students.—Professor R. O. Kapp, B.Sc., M.I.E.E.

Tutor to Medical Students.—W. H. Newton, M.D., D.Sc.

LIBRARY STAFF.

Librarian.
J. A. Wilks, M.A., F.L.A.
Fellow of the College.

Sub-Librarian.
Norah Beale, B.A.

Assistant Librarians.—F. M. C. Johnson, Joyce Pearson, F.L.A., A. E. Tooth, M.A., F.L.A.,* C. R. Fincken, B.A.* Senior Library Assistant.—R. A. Blackall. Library Assistants.—R. I. J. Tully, F.L.A., C. F. A. Marmoy, F.L.A.* Junior Library Assistants.—H. W. Callaghan,* J. Lust,* F. C. Greenham.* Clerical Assistant.—Joyce M. Haymes, B.A.

THE PROVOST.

In Memoriam.

SIR ALLEN MAWER, M.A., Litt.D., D.C.L., F.B.A.

News of the sudden death of Sir Allen Mawer on July 22nd, 1942, during a train journey from Hertfordshire to attend a University meeting in London, came as a great shock to the College circle and brought a sense of personal loss to every member of it, for he was greatly beloved.

When Sir Allen Mawer was first introduced to the College, in 1930, as its new Provost, there may have been some who feared lest one whose connection with it had been broken for many years after a brief student career (1898–99) would be unequal to the task of maintaining and promoting its traditions and aspirations, following after one who had been steeped in those traditions and who had done so much to create the aspirations. Those doubts were speedily dispelled, for from the moment he took up his office Sir Allen showed himself to be possessed of a remarkable aptitude for grasping a situation and seeing into the very heart of a problem. He also showed himself ready to devote himself entirely to the needs of the great institution of which he had become Head, and no one laboured more disinterestedly than he for its well-being. While able to take a firm stand when occasion demanded it, he exercised his authority with a lack of formal officialdom which had the great advantage of bringing him into close touch with those with whom he had to deal. He was the friend of the teacher, the student, the administrative officer and the servant, and treated everyone with a tact and consideration which endeared him to all. No personal problem was too small to receive his sympathetic attention.

His relations with the College Committee and the Professorial Board were very happy. Having the qualities that are of peculiar value at the council table—a clear mind, lucidity of expression, a well-balanced judgment and unfailing good temper—he was in great demand as a member, and in many cases chairman, of committees other than the numerous bodies of which he was an *ex officio* member in the College and University. These brought him into touch with a variety of aspects of the educational problem and made great claims on him, but he never seemed to grow weary in dealing with them or unwilling to do his utmost towards their solution. His attendance at meetings was exemplary and showed a sense of duty which characterised his life.

During his tenure of office, many changes were effected in relation to the conditions of service of the academic, administrative and servant staffs, and the amenities of College life were improved in many respects. His was the guiding hand in all these reforms, and he took great pains to ensure that the claims of none were overlooked. On the social side he was ready to place his time at the disposal of all sections of the community, and few College events seemed complete without his presence. Lady Mawer identified herself with her husband in this side of his work, and it was a characteristic gesture that, in the earlier days, the doors of their home should be open to members of the academic staff on Sunday afternoons. In receiving guests at the College, Sir Allen had a happy way of making them feel welcome. He had a "royal memory" in the matter of associating persons with their special interests, a gift which brought the College many new friends.

The recent War years produced special problems for the Head of the College, as past Annual Reports have shown. Through them all, Sir Allen maintained his infectious high spirits and undaunted cheeriness, though they involved him in much personal sacrifice, including evacuation to Stanstead Bury and innumerable train journeys to pay visits to the centres and to attend meetings. It was in the course of such a journey that his end came.

His scholarly attainments and his special work in Place Names, with which his name will long be identified, can only be briefly mentioned here. He was an English scholar of great distinction. During his student career he showed promise of this, taking the London B.A. as an External Student with First Class Honours and an Exhibition. He was the Morley Medallist of his year at the College. When he passed on to Cambridge, he took the English section of the Mediæval and Modern Languages Tripos with double distinction. He was a Fellow of Gonville and Caius College from 1905–11, and in 1935, in view of his later career, was elected an Honorary Fellow. His work as a teacher of English took him to the University of Sheffield as Lecturer (1905–8), to Armstrong College, Newcastle-upon-Tyne, as Joseph Cowen Professor (1908–21) and to the University of Liverpool as Baines Professor (1921–29). Thus he came to University College at the beginning of 1930 as a peer among his fellow-scholars, but there was nothing of the pedagogue in his manner, which was as simple and unaffected in the Students' Common Room as in the Professors' Smoking Room.

Despite the heavy claims made by his official duties on his time and energies, he continued his work as Director of the Survey of English Place-Names with unabated enthusiasm until the time of his death, and has left a long list of publications embodying the results of his researches.

Among the honorary offices that he held were those of President of the Modern Language Association (1932), President of the

Philological Society (1936) and Vice-President of the Viking Society for Northern Research. He was also Honorary Director of the Department of Scandinavian Studies at the College.

By reason of his office and his personality, he took a leading part in the counsels of the University. At the time of his death he was Chairman of the University Library Committee and of the Collegiate Council. One of his special interests was the provision of educational facilities for members of His Majesty's Forces, and he was Chairman of the special committee formed for that purpose.

He received the honour of Knighthood at the time of the King's Coronation (1937).

He was a Fellow of the British Academy and held the honorary degrees of Litt.D. of the University of Cambridge and D.C.L. of the University of Durham. He was elected a Fellow of University College in 1930.

The Professorial Board, at a Special Meeting held on August 6th, 1942, paid the following tribute to him :—

> When after thirty years Allen Mawer returned to be the Provost of the College where as a student he had won no little distinction, he was as yet a stranger to most of us. We had not long to wait before we realised how great was our good fortune. For he was a man singularly well equipped for the task to which he had been called. A great scholar of European reputation, he was wholly free from those limitations which much learning seems at times to impose on its possessors. He was as much at home in the world at large as he was among his books. Easy of access and always ready to consult and listen to the views of others, he guided us with a hand that was as gentle as it was firm. His skilled administration, his wise counsel and his grasp of the problems which confronted him bore fruit in measures which notably increased the well-being and efficiency of our College, while to the larger sphere of the University of London he brought a no less welcome contribution by his sound judgment and his breadth of outlook. But he has a deeper and more personal claim upon our gratitude. For he was one of the best and most lovable of men, gifted with a wide humanity, a sympathy as ready as it was understanding, a constant cheerfulness, and a delight in the company of his fellow-men, which made the College a better and a happier place. No member of our community—from Professor to Student—could come in contact with him and not feel that the Provost was his friend. And above all, with these gifts there went a selfless devotion to duty, a singleness of purpose, a fundamental righteousness, which gave him among all difficulties infinite patience and unfailing strength. And so it came about that everywhere and always he commanded our affection, our loyalty and our trust. His death has come at a

time when least of all he could be spared. Much of the College is in ruins, its departments are scattered far and wide, and his guidance and inspiration are needed as never before.

Remembering all these things, we offer to Lady Mawer and her daughters our deepest sympathy in the calamity which has fallen upon them with such tragic suddenness.

The following is the resolution of the College Committee, adopted at a Special Meeting held on the same day (August 6th, 1942) :—

The College, during the past three years, has suffered many grievous blows, but the latest and the most tragic has been the death of the Provost, Sir Allen Mawer. The Professorial Board has paid tribute to his learning and his happy relations with the staff and students, and the College Committee desire to associate themselves with this tribute. They would wish here to record, in addition, the immense debt which they owed to his wise and kindly administration of the College during the twelve years that he held the office of Provost. In every problem that came before them, especially in the many that have arisen during these years of war, he spared no pains in order that the Committee should have the fullest knowledge of the views of all those interested which would enable a fair and just decision to be reached. He had a rare gift of penetrating to the heart of such problems and of presenting them to the Committee with a lucidity and a breadth of outlook that were of inestimable value.

If this had been all, it would have been much, but there was more. No member of the College Committee could take part in the work of the Committee without realising the great trust which the College had in the Provost's leadership and the qualities on which that trust was based. Evidence of that leadership is clear in the great changes that have taken place in the conditions of service of the members of the staff—academic, administrative and servant—and in the position of students as part of the corporate body. It was also clear in the last great task laid upon him of planning for the reconstruction of the ruined College buildings after the war. That task he was not destined to see finished, but he had already clearly established the broad outlines on which it could be carried through successfully.

The College Committee record with profound sorrow the passing of a beloved Provost and offer to Lady Mawer and the family their deepest sympathy in the tragic and sudden calamity which has befallen them.

The meetings of both these bodies took place on the day of the Memorial Service at Christ Church, Woburn Square, at which some 400 members of the University, the College, and Learned Societies were present.

Appointment of Dr. D. R. Pye.

Dr. David Randall Pye, C.B., M.A., Sc.D., F.R.S., has been appointed third Provost of the College. He took up his full duties as from New Year's Day, 1943, but made his first official appearance when he presided at a meeting of the Professorial Board at Leatherhead on December 19th, 1942.

He comes to his new office with a varied experience of University, industrial and national affairs. Having taken the Mechanical Science Tripos at Cambridge, followed by practical Engineering work, he went to Oxford for five years (1909–14) as Lecturer in Engineering Science and Fellow of New College. After an interruption for War Service as Experimental Officer with the R.F.C. and R.A.F. during the Great War of 1914–18, he returned to his academic life, this time at his own University, Cambridge, as Fellow of Trinity College and Lecturer in Engineering (1919–25). In 1925, he became Deputy Director of Scientific Research at the Air Ministry (now the Ministry of Aircraft Production) and since 1937 has been Director. The range of his personal interests covers music, literature and mountaineering.

Dr. Pye has no past associations with University College, but in the short time which has elasped since his appointment he has already made himself acquainted with much of its history and of the problems which await solution in the immediate future. The period of reconstruction and development which lies ahead will be a difficult one, but the new Provost takes office with the goodwill and support of all members of the College to help him. The College Committee have placed the administration in his charge with every confidence that he will be equal to the task which he has undertaken.

STAFF AND STUDENTS.

The more stable conditions of work in evacuation, referred to in the Report of 1942, have been maintained throughout the past twelve months. The Session 1942–43 opened with only one slight variation from the arrangements of the preceding session, namely, the transfer of the Department of Political Economy, with Dr. P. N. Rosenstein-Rodan as acting-Head, to the University of Cambridge, where the work can be co-ordinated with that of the London School of Economics. Provision is, however, still made at Aberystwyth for those students who are taking Political Economy as a subsidiary subject or as a subject for the Intermediate Examination in Arts.

Once again the College Committee desire to record their grateful thanks for the continuing hospitality provided by the receiving colleges and universities at Aberystwyth, Bangor, Swansea, Oxford and Cambridge.

The following table shows the distribution of courses and students in the current Session (1942–43), with the figures of 1941–42 for purposes of comparison.

SESSION 1942–43.

Centre.	*Course.*	*Number of Students.* *Men.*	*Women.*
(i.) In the University of Wales:			
University College of Wales, Aberystwyth.	(a) *Faculty of Arts:* Intermediate Course; General Degree Course; Honours Schools in Classics, English, German, Philosophy, Psychology, Anthropology, Geography and Geology; Academic Diploma in Psychology	45 (49)	115 (95)
	(b) *Faculty of Science:* General Degree Course (when Geography or Geology is taken); Special Degree Courses in Chemistry, Psychology, Geography and Geology	70 (64)	33 (27)
University College of North Wales, Bangor.	(a) *Faculty of Arts:* Honours Schools in French, Italian, History and Mathematics.	16 (19)	49 (46)
	(b) *Faculty of Science:* Intermediate Course (including First Year Medical Sciences); General Degree Course (not including Geography or Geology); Special Degree Course (other than Chemistry Psychology, Geography and Geology)	92 (96)	79 (73)
University College, Swansea.	The Faculty of Engineering ..	58 (46)	— (—)
(ii.) In the University of Oxford: The Ruskin School of Drawing.	The Slade School of Fine Art..	14 (21)	71 (77)
(iii.) In the University of Cambridge.	The Bartlett School of Architecture	28 (42)	37 (33)
	The Department of Political Economy	9 (9)	6 (7)
	The Faculty of Laws	9 (24)	7 (8)
(iv.) At Leatherhead.	The Faculty of Medical Sciences	77 (77)	42 (47)
(v.) At Rothamsted Experimental Station.	Eugenics and Genetics	1 (2)	— (—)
		419 (449)	439(413)
	Total number of students	8(862)	

Of the above students, 56 are postgraduate, 677 are preparing for first degrees, 94 for diplomas, 10 for Architecture or Decoration certificates, and 21 are taking other courses in Architecture or Fine Art.

It will be seen that the total number of students enrolled for this Session only falls short of the number of 1941–42 by four. The number of new entries has actually risen this year—404 (203 men, 201 women) as against 335 in 1941. This position may appear surprising in the light of the recent more stringent Government regulations regarding the call-up of University students, but an analysis of the figures will, to some extent, explain it. While the number in the Faculty of Arts at Aberystwyth is 16 above last year, and at Bangor remains the same as last year, there is a decrease of 10 in the School of Architecture and of 13 in the Slade School. Only 15 students are taking courses in the Department of Political Economy, whose numbers have steadily declined during the War, and in the Faculty of Laws the number has shrunk from 32 to 16. The Faculty of Science at Aberystwyth has had an increase of 12, and at Bangor an increase of 2, while the Faculty of Engineering at Swansea also has an increase of 12. These higher figures are largely due to the number of State Bursars taking special courses. There are 43 of these in the Faculty of Science (18 second year, 25 new entries) and 37 in the Faculty of Engineering (11 second year, 26 new entries). It was not anticipated in the first instance that so many State Bursars would continue for a second year and, in order to ensure the provision of sufficient laboratory accommodation for Physics at Bangor to meet the demand created by the number of renewals, it became necessary during the Long Vacation of 1942 to lease and equip a vacant shop for the department. The equipment was sent from Gower Street and the work of installation was mainly done by Mr. Rowe, Laboratory Steward, with some help from members of the Works Department of the College, under the supervision of Mr. Orson Wood. The Faculty of Medical Sciences figure has only varied by the admission of five fewer women applicants selected from a large number, many of whom had to be rejected in view of the restricted opportunities for women in their later years of clinical study.

It is satisfactory to note that postgraduate work has not only been maintained, but slightly increased. The figure of 56 compares with 53 last year. The equipment required has been supplemented from time to time from the apparatus still in London. Its transfer has not only the obvious advantage of improving the facilities available for research while the College is in evacuation, but also decreases the responsibility for its upkeep while in the disused London laboratories.

The close of the third session of war-time dispersal (1941–42) saw the completion of a three-year undergraduate course conducted in

exile. Of those students who entered the College at the beginning of the War and who have left after the normal period, few have even visited the London buildings. The Committee recognise with regret that this will now be the prevailing experience of students until the international situation warrants a return to Gower Street. They welcome all the more on that account the signs of a strong corporate spirit at each evacuation centre and desire to use this opportunity of acknowledging the service rendered to the community by those students who have taken a leading part in fostering and promoting College traditions, either by their own individual efforts or through the Union Societies and the Inter-Union Standing Committee. These bodies and the editorial board of *New Phineas*, the College magazine, are doing invaluable work, the effect of which cannot be measured in words. Without such agencies operating between the scattered Faculties and departments, a sense of corporate unity, so necessary among the constituent elements of a large educational institution, would be hard to maintain.

While the ties of U.C.L. in exile have thus been strengthened, friendly co-operation with the students of the host colleges has not been lacking. The College has been well represented in the athletic teams of the Welsh colleges, and many societies have been run on a common basis for Welsh and London students, to mutual advantage. London students have benefited from the more varied outdoor life afforded by their changed surroundings and have availed themselves of the opportunities for country rambles, hill-climbing, boating and the like.

A war-time version of Foundation Week was again observed at the larger centres in 1942, with as much of traditional custom as present conditions permitted. At Aberystwyth, the Foundation Address was given by the late Dr. H. G. Stead on "The Education of a Community," and a debate with representatives of the old friendly rival, King's College, who made the journey from Bristol at the invitation of U.C.L., seemed an echo from former London celebrations. These guests also attended the Foundation Dance. At Bangor, the Address by Professor Norman Baynes on "The Custody of a Tradition" had a special significance by reason of the subject and the manner of its treatment, and also because it came on the eve of Professor Baynes' retirement (see page 27). That it made a deep impression on the students is evidenced by the fact that the Inter-Union Standing Committee subsequently arranged to have it printed as a record of an outstanding occasion. A performance of "The Wind and the Rain" by the Dramatic Society was included in the Bangor programme. A visit from the late Provost, Sir Allen Mawer, enhanced the success of both these major Foundation celebrations. At Swansea, the Address on the College in London, which is now so poignantly associated with Professor Chambers' last days, was read by Professor Kapp. The plucky journey of the author, although

in ill-health, to deliver it in person to the Engineers, and the grave illness which supervened, are referred to in greater detail elsewhere (page 42).

The Slade students at Oxford and the Architecture and Laws students at Cambridge have lightened their hard work with a fair leaven of sociability. The members of the Slade School have taken full advantage of the opportunities for outdoor sketching afforded by the purlieus of the Oxford colleges and have had some good boating excursions up the Thames. Past and present members have been represented with distinction at recent Art exhibitions, and it is especially pleasant to record the purchase for the Tate Gallery collection of a pencil drawing of " The Oxford University " by Professor Schwabe. The Bartlett School was instrumental in arranging, as well as participating in, an exhibition at Cambridge of the work of students of architectural schools in southern England, which was opened by the Principal of the Cambridge School of Architecture, to whose hospitality and co-operation the College is much indebted. In the case of the Laws students, the old tripartite arrangement between University and King's Colleges and the London School of Economics has been maintained and meetings of the Laws Society have been held regularly.

As for the medical students at Leatherhead, the deprivations due to exile from the London laboratories have been offset by an atmosphere of residential collegiate life denied to our students of the pre-War era. In the words of a report sent to *New Phineas*, " The great point is that our college life does not start at 9 and end at 5. It goes on all the time, seven days a week, and is in many respects a worthwhile experience." Once again the College Committee have the satisfaction of reporting that of the twenty-six successful applicants, all British medical students, for the studentships granted by the Rockefeller Foundation for clinical training at a University in the United States or Canada at a time when such facilities may not be available in this country, three were University College men, the same number as at the corresponding selection of 1941.

The compulsory shortening of courses required by recent Government regulations has necessarily involved more strenuous application on the part of staff and students. Notwithstanding this, the claims of national and social service have not been neglected. Some of the men students have enlisted in the local Home Guard, and students of both sexes have taken their share in the fire-watching, canteen work, First Aid parties, and the Scout and Guide movements of the localities to which they have been evacuated.

The desire for reunion remains strong, and opportunities for forgathering have been taken whenever they have presented themselves. The full committees of the two Union Societies and the Inter-Union Standing Committee, which are representative of all

the centres, have met from time to time in the vacations at Gower Street, and in April, 1942, gladly accepted the hospitality of Leatherhead for a two-day session. For the first time since the war-time dispersal, a College Reunion in London was arranged under the auspices of the Inter-Union Standing Committee, and proved an unqualified success. It was held on the afternoon of Saturday, January 2nd, 1943, in the Queen Mary Hall of the Central Y.W.C.A. in Great Russell Street. Some five hundred members of the College, staff and students, assembled there, and Phineas himself graced the occasion. A full programme of entertainment included a sing-song with the College Song Book, conjuring, a sketch by the Dramatic Society, dancing and refreshments. The chief interest of the afternoon, however, centred in the first appearance of the new Provost and Mrs. Pye at a general College gathering. Dr. Pye was formally introduced to the students by Professor Jeffery and was warmly welcomed with the College cry. In the course of a short speech, he expressed the hope that it would be possible to arrange further London reunions at more frequent intervals, a suggestion which received the heartiest approval. The presidents of the two Union Societies, Mr. Gunaratne and Miss Howitt, also spoke briefly. The College Committee feel that special thanks are due to those students whose enthusiasm first envisaged such a reunion and whose energy and hard work achieved such a result. The opportunity was also taken during that week-end of showing parties of the exiled students the London site and buildings under the guidance of Professor Jeffery and the Secretary, Mr. Tanner.

The activities of the Old Students' Association have been at a standstill since the War began, but steps have been taken during the past twelve months with a view to safeguarding its future welfare. Representatives at the evacuation centres have been appointed with the special task of bringing the Association to the notice of students who are eligible for membership, so that, by joining it, they may retain their connection with the College after its return to London, and to that extent repair the lack of London collegiate life in their student years.

THE ACADEMIC STAFF.

During the period under review, there has been no change in the arrangements by which members of the academic staff are carrying on the organisation of the life and work of the College in evacuation. The following professors are continuing to act as responsible Heads at the centres :—

Aberystwyth	Professor H. E. Butler.
Bangor	Professor G. B. Jeffery.
Swansea	Professor R. O. Kapp.
Leatherhead	Professor F. R. Winton.

Cambridge :	
Faculty of Laws.....	Professor G. W. Keeton.
Bartlett School of Architecture	Professor A. E. Richardson.
Oxford :	
Slade School of Fine Art	Professor Randolph Schwabe.

In the case of the departments where the heads are absent on War Service, or for any other reason, members of the Assistant Staff have been appointed as acting-heads. The following are acting in that capacity during the Session 1942–43 :—

Faculty of Arts :	
Political Economy.....	Dr. P. N. Rosenstein-Rodan.
Faculty of Science :	
Chemistry (Bangor section)..	Dr. O. L. Brady.
Physics	Mr. D. Orson Wood.
Geology.....	Dr. L. J. Chubb.
Faculty of Medical Sciences :	
Anatomy	Dr. Una Fielding.
Embryology and Histology..	Mr. K. C. Richardson.
Physiology	Dr. W. H. Newton.
Biochemistry	Dr. L. Margaret Kerly.
Faculty of Engineering :	
Mechanical Engineering	Mr. B. J. Lloyd-Evans.

Mr. Orson Wood, Senior Tutor, and Dr. L. W. Tancock, Assistant Tutor to Arts Students, at Bangor ; Miss E. Goodyear, Tutor to Women Students, Dr. J. F. Lockwood, Tutor to Arts Students, and Mr. H. Terrey, Assistant Tutor to Science Students, at Aberystwyth ; Dr. W. H. Newton, Sub-Dean, and Mr. K. C. Richardson, House Tutor, at Leatherhead ; Mr. L. Stuart Stanley, Tutor to Architecture Students at Cambridge ; and Mr. R. Nuttall-Smith at the Slade School at Oxford, are all taking a valuable share in securing the smooth running of the administrative side. Without their help the problems of evacuation would be much more acute.

It is not possible within the limits of a wartime Report to note all the changes in the personnel of the academic staff, but there have been certain outstanding retirements or resignations, affecting four Faculties, which must be noted.

The retirement of Professor Norman Baynes at the end of 1941–42 has withdrawn from active participation in College life one who has taken a leading part in it for many years and who, by his genial humanity and peculiar gifts, has endeared himself to the large circle of staff and students who have had the privilege of knowing him. Fortunately for the College, he retains his membership as a Fellow, so there is no occasion to take formal leave of him. The College Committee feel, however, that his retirement provides them with a fitting opportunity of acknowledging his great services to the community, both on the academic and the social side. He joined the Department of History as Assistant in Ancient History in 1913 and received the title of Reader in the History of the Roman Empire

in 1919. In recognition of his distinction as a scholar, writer and teacher, the Senate raised him to professorial rank at the opening of 1932, when he became Professor of Byzantine History. At the end of 1936–37 he relinquished the share he had taken in the teaching of Ancient History in order to concentrate his energies on his own particular field of Byzantine History, and, with characteristic generosity, expressed his desire on that account to forgo the emoluments of his professorship, continuing thereafter to give his services on a voluntary basis. As Director of the Evening School of History from 1927 to 1933, he did memorable service, and many of the teacher-students and research workers of the School have reason to be grateful for his inspiration and encouragement. His public lectures have made a greatly valued contribution to that side of the work of the College. An eloquent and humorous speaker, he has often been called upon to speak at official and student gatherings and has always proved himself a cheerful victim to the social cause. It has been a matter of regret to his many friends that his last years on the active list have occurred during the period of dispersal, but they look forward to seeing him in his old haunts in the days of reunion which lie ahead, at such times as his literary work will permit. It is a pleasure to record that his own University, Oxford, has recently conferred its Honorary D.Litt. degree upon him. A graceful tribute was also paid to him on the occasion of his retirement by a body of his friends who had a bibliography of his writings printed privately at the Oxford University Press. A specially bound copy with a Latin Address was presented to him.

The resignation of Dr. Camillo Pellizzi, Professor of Italian, as from May 1940, has been accepted by the Senate. He had been associated with the Department of Italian since 1920, first as Assistant and later as Reader and Barlow Lecturer on Dante, and was appointed Professor on the retirement of the late Professor Edmund Gardner in 1934. He was in Italy at the outbreak of War between Britain and Germany and has not since returned to this country. It is a matter of great regret that pleasant relations with one who had served the College so well should have had to be terminated in such unhappy circumstances.

Dr. Charles Singer, Professor of the History of Medicine, retired at the end of 1941–42. He first joined the staff at the beginning of 1920 as Lecturer, receiving professorial status in 1931. Like that of Professor Norman Baynes, his professorship was an *ad hominem* appointment in recognition of high academic standing and distinguished services to Learning. An authority on his subject in its widest aspects, with an international reputation, Professor Singer generously gave his services to the College, of which he had himself been a student, without drawing any emoluments. By his profound knowledge and keen intellect, he has added lustre to the professoriate and has enriched the resources of the Faculty of

Medical Sciences. His earnest efforts on behalf of refugee students who had had the misfortune to become the victims of Nazi or Fascist oppression have also been a contribution, on the humane side, to the world of Science which he has served so notably.

The retirement of Dr. Paul Haas, Reader in Plant Chemistry, also took place at the end of 1941–42. His connection with the College is a long one, beginning as a pupil of University College School and continuing as a student from 1894 till 1899. He was appointed Lecturer in the Department of Botany in 1919, and the title of Reader was conferred upon him two years later (1921). In addition to the valued service he has rendered to his own department, he has taken a full share in the general life of the College. Inheriting a love and knowledge of music from his gifted mother, Madame Alma Haas, he has been a staunch supporter of the Music Association. As President of the Old Students' Association during the difficult period of dispersal, he has taken a part in the effort to meet the problems of the present day. He is a Fellow of the College, and his friends hope to see him among them from time to time.

The retirement of Mr. D. Cameron, of the Department of Civil and Mechanical Engineering, has also to be noted. He joined the staff in 1919 as Demonstrator, and, since 1928, has been Senior Assistant. Throughout his College career he has been single-minded in his desire to promote the welfare of his students and has earned the esteem and affection of his colleagues.

The Professorial Board.—Leatherhead has continued to afford week-end hospitality for vacation assemblies of members of the Professorial Board and other academic committees. These opportunities of meeting in such pleasant surroundings prove very popular and are of great assistance in promoting discussions, both formal and informal, of problems which concern the College as a whole. Three such assemblies have been held during the past twelve months, at the latter of which, on December 19th, 1942, the new Provost presided for the first time. In addition, the Professorial Board has held two meetings at Gower Street, where a room suitable for such meetings has now been prepared.

Public Lectures.—The Session 1942–43 has seen the beginning of a scheme to revive the work of the College in London by the provision of lunch-hour public lectures. The object is two-fold :—(i.) to make a contribution to the cultural life of the metropolis in wartime, (ii.) to remind Londoners that University College continues to exist as an educational institution. Professor John Macmurray has interested himself in the scheme and, as a means of testing the likely response on the part of the public, delivered two lectures in the Anatomy Theatre early in December on "Comparative Democracy : I.—The Tradition of Negative Democracy ; II.—The Problem of Positive Government." The result

was most encouraging. Over 150 members of the general public attended each lecture and evinced a keen appreciation, many remaining behind to consult the lecturer. There seems, therefore, no reason to doubt the success of the development of the scheme, and a programme for the Second Term is now under consideration. It is hoped that more than one lecture a week will be possible. No fee will be charged and admission will be without ticket.

GENERAL FINANCE.

Financial Year 1941–42.

The Accounts for the year ended July 31st, 1942, are appended to this Report (Appendix I.).

College Establishment Income and Expenditure Account.

Income.—The ordinary income decreased by £8,821 13*s.* 8*d.*, from £171,594 4*s.* 6*d.* to £162,772 10*s.* 10*d.* The main causes were a decrease of £2,010 in fees, due to a decrease in the number of students, and a decrease of £4,090 in the University Court Grant.

Expenditure. — The ordinary expenditure decreased by £6,918 9*s.* 5*d.*, from £155,159 18*s.* 8*d.* to £148,241 9*s.* 3*d.* There have been further savings due to the release of members of the academic, administrative, and servant staffs for National Service and reductions under the head of Maintenance of Premises.

The excess of ordinary income over ordinary expenditure was thus £14,531 1*s.* 7*d.*, which, together with the sum of £3,009 received in respect of the claims for temporary repairs to air-raid damaged property and £735 received in respect of the temporary occupation of College buildings, was sufficient to meet the cost of evacuation, accommodation in other Colleges, and War Damage Insurance, in addition to the other extraordinary expenditure, leaving a surplus of £342 1*s.* 10*d.* This surplus, together with the available surplus income of Trust Funds appropriated under the Emergency Statute, was allocated as follows :—£12,350 to General Reserve Fund, £477 16*s.* 4*d.* to General Library Reserve Fund, and a final surplus in respect of 1941–42 of £44 10*s.* 11*d.* carried forward.

BENEFACTIONS AND DONATIONS.

The College Committee make grateful acknowledgment of the Grants, Subscriptions and Donations received from the bodies and persons named in Appendix II. (pages 62–63).

They also desire to record their thanks for the following further gifts received during the past twelve months :—

(i.) *Gifts to the Library.*

The Cambridge Antiquarian Society, through the good offices of Dr. Margaret Murray.

89 volumes of the publications of the Society.

Mrs. N. de G. Davies.

174 volumes and pamphlets for the Egyptology Library, from the Library of her late husband, Norman de Garis Davies.

The late Mr. N. Eumorfopoulos, Fellow of the College.

83 volumes and pamphlets, mainly concerned with the History of the College, with Egyptology and with Science.

Miss L. M. Eyre, a former student.

The sum of £5, expended in the purchase of books for the English and Scandinavian Libraries, together with 37 volumes.

Mr. Ivor Grantham.

248 volumes of Scandinavian Literature and history from the Library of his father, the late Mr. W. W. Grantham, K.C., for the Library of the Viking Society of Northern Research.

The late Sir Joseph Larmor.

A bequest of £250 to the University of London "to be employed by them for Library purposes, especially towards the restoration of the Library of University College in that University wrecked by hostile air raids". The Court of the University has decided that the whole of this bequest shall be devoted to the restoration of the College Library.

The relatives of the late Dr. Alice Lee, Fellow of the College, through Dr. E. M. Elderton.

35 volumes of general scientific and English literary interest.

Miss A. L. Littleboy, a former student.

26 volumes of English literature.

The late Mrs. G. Lorimer, a former student.

102 volumes and pamphlets, mainly Danish literature.

Miss D. G. Matthew.

37 volumes, Classics and Fine Art.

Lady Mawer.

262 volumes and pamphlets from the Library of the late Sir Allen Mawer.

Professor P. E. Newberry.

29 volumes for the Egyptology Library.

Mrs. Stephen Pace.

273 volumes and pamphlets, chiefly on Marine Biology.

Queen's University, Kingston, Ontario.

76 volumes for the Scandinavian Library.

Mr. R. V. Quinault, a former student.

32 volumes, mainly German literature.

Mr. Arthur Rowntree, Fellow of the College.

21 volumes, mainly French and German literature.

Lady Seward.

92 volumes, chiefly botanical, from the Library of her late husband, Sir Albert Charles Seward, Professor of Botany at Cambridge, 1906–36.

Brigadier-General A. M. Tyler, through the Friends of National Libraries.

68 volumes, chiefly English literature.

Mr. John Wilks, Librarian and Fellow of the College.

55 volumes, translations of German classics of the 18th century.

The late Dr. A. Wohlgemuth and Mrs. Wohlgemuth, former students of the College Department of Psychology.

Some 1,300 volumes and pamphlets in Philosophy and Psychology, together with some 4,000 volumes and pamphlets in English literature, German language and literature, Romance languages, etc., and 14 bookcases, in addition to 100 titles given to the Department of Psychology.

(ii.) *Other Gifts.*

Under the Will of the late Dr. Elsie V. Hitchcock (see page 47) :— (i.) £200, free of duty, to be invested and the income used for an annual prize to that student in the Department of English who in the opinion of the Professors had done best work on the Language side in the Honours course ; (ii.) All her books ; (iii.) £500, free of duty, subject to a life interest, to be invested and the income to be used for an annual lecture in memory of Professor R. W. Chambers (see page 39) on some subject connected with English Literature.

Under the Will of the late Miss Mabel Goldthorp, the sum of £100, free of duty, left to the College " in gratitude for the pleasure and benefit her sister and herself had derived from its public lectures." The College Committee have formed this legacy into a Trust, the income of which is to be applied to the payment of the expenses of lecturers delivering public lectures, other than endowed lectures, at the College.

From the General Electric Company, through the good offices of Dr. W. Wilson, a further gift for the Department of Electrical Engineering, consisting of five boxes of lantern slides.

Under the Will of the late Mr. Wynne J. Scott, student of the Slade School 1937–9, who died on active service in India, certain of his books and drawings.

ADMINISTRATION.

The lamented death of the Provost, Sir Allen Mawer, on July 22nd, 1942, and the inevitable delay before his successor could take up office, laid a very heavy burden of additional administrative responsibility upon the Secretary, Mr. E. L. Tanner. Immediately the emergency arose, the Chairman of the College Committee, acting on behalf of the Committee, appointed Mr. Tanner Acting Provost under College Statute 29. In discharging the duties of that office in exceptionally difficult circumstances, he had the assistance of the senior members of the academic staff, more especially the Deans of the five Faculties, with whom he was in frequent consultation. The College Committee recognise that the way in which the College has been enabled to continue to steer a clear course despite its great misfortune is in large measure due to the readiness of all who have had it within their power to help and to the wise counsel which has been forthcoming. They feel that they were fortunate in having in the Secretary of the College one who, by his personality and experience, could shoulder sudden responsibility, and they appreciate the entire devotion he has shown to the welfare of the College, sparing himself in nothing that would help to surmount the many difficulties which have arisen.

Colonel D. Howard Gill, Establishment Officer, retired under the age limit at the end of 1941–42. He held office during a period when the position of the Servant Staff was carefully reviewed and improvements in the conditions of their service were initiated, including the establishment of a contributory pension scheme, a graded scale of wages, and an increase of social amenities. In all these matters, Colonel Gill took a great personal interest and gave valuable assistance.

During the past twelve months, the arrangements for carrying on the central administration of the College have continued as before. The Secretary, Registrar, and several members of the clerical staff, the Librarian and some of his staff, have worked at Stanstead Bury, Stanstead Abbotts, near Ware, Herts. The Superintendent of Buildings, with his staff, and the Assistant Secretary have been in daily attendance at Gower Street.

The administration of the various teaching centres has been in the charge of those members of the academic staff to whom reference is made on pages 26–27, in some cases with the assistance of members of the administrative staff. Miss Winifred Radley, Deputy Registrar, has continued to give invaluable help at Bangor. Miss Valerie Heubach, Confidential Clerk, who had done similar work at Aberystwyth, resigned during the First Term in view of her approaching marriage, and her place has been filled by Miss Dorothy Lloyd. Miss Gertrude Holmes, a Faculty Clerk in Medical Sciences, has also left on account of her marriage, and Miss Evelyn Morrell has been appointed.

THE COLLEGE BUILDINGS AND THE WAR.

The past twelve months have, happily, passed without further damage to the College buildings by enemy action. Much thought has been given to the question of rehabilitation and reconstruction, with a view to having approved plans in readiness for the earliest opportunity of carrying them out. As a first step towards re-occupation with a minimum loss of time, a certain amount of reconditioning has already been effected by the Works Department under the direction of the Superintendent of Buildings. A temporary scheme for the distribution of departments amongst such parts of the buildings as could be made available for use in a comparatively short time, so that the work of the College could be carried on in London during the reconstruction of the destroyed parts, has been generally approved. Professor A. E. Richardson has been appointed architect for the work of reconstruction and has submitted plans to the College Committee and Professorial Board, which are still under consideration.

Meanwhile, pending the time when the international situation warrants a return to London, much of the habitable portion of the buildings is being used for other than College purposes. The University Appointments Board, the Lodgings Bureau, and the School of Slavonic Studies, all of which had been rendered homeless, are temporarily housed in Crabb Robinson and Henry Morley, the Universities Bureau of the British Empire has its office in the School of Architecture, and other parts are being used for National work. Thus not only is the War effort being served, but those particular parts of the buildings are being protected from further deterioration through disuse.

PRO PATRIA.

The following lists concerning past and present Students and other members of the College on War Service have been compiled up to December, 1942, from the College records. The Committee realise that these records are probably incomplete owing to lack of information. Any further information which relatives or friends are able to supply will be gratefully received. It should be sent to the Secretary at the London address.

THE ROLL OF HONOUR.

Alderson, C. R. (Medical Sciences 1920–23.)
Major in R.A.M.C.—Died as prisoner of war at Posen, February 1942.

Bristow, J. H. (Member of College Servant Staff since 1923.)
Royal Naval Reserve.—Reported missing, believed killed in action at the landing at Algiers, 10th November, 1942.

Burchardt, C. G. (Laws 1938–39.)
Sergeant Pilot R.A.F.—Killed on active service, August 1941.

Doswell, A. M. (Architecture 1936–39.)
Wireless Officer in Merchant Navy.—Reported missing (believed killed), April 1941.

Dunford, A. (Assistant Lecturer in Electrical Engineering 1939–41.)
Captain, Royal Marines.—Reported missing from Crete Expedition, died a prisoner of war, 8th August, 1941.

Dunn, D. J. (Laws 1938–39.)
Flying Officer, Heavy Bombers.—Reported killed December 1940 : confirmed September 1941. [Officially presumed killed in action.]

Fisher, P. J. (Science 1935–37.)
Flight-Lieut. in R.A.F.—Killed in action in Middle East, 1942. (Shot down over Benghazi, 4th March, 1942.)

Fleming, R. D. S. (Laws 1938–39.)
R.A.F.—Reported killed March 1941.

Flint, R. R. (Arts 1936–39.)
Pilot Officer in R.A.F.—Killed July 1942.

Hare, J. E. (Science 1938–39.)
Radio Officer in Merchant Navy (in Marconi Co.'s service June 1940).—? Killed in action June 1941 (identification not certain).

Harper, A. J. R. (Arts 1936–39.)
Navigator in Fleet Air Arm. Ship torpedoed January 1941—no news since (presumed dead).

Hunt, H. N. (Engineering 1936–39.)
Pilot Officer in R.A.F.—Killed in accident on convoy patrol, 13th May, 1941.

Ibbetson, D. B. (Arts 1938–39.)
Lieut. in R.A.—Killed in action in Middle East, June 1942.

Ledward, J. A. (Slade School 1921–24.)
Lieut. in R.E.—Served as camouflage officer. Died of wounds at Mt. Kemel, 24th May, 1940.

Mair, J. D. (Arts 1933–35.)
Pilot Officer in R.A.F.V.R.—Killed on active service, April 1942.

Mitchell, A. S. (Arts 1927–28.)
Leading Aircraftman in R.A.F.—Killed in collision during training flight, 25th June, 1942.

Monroe, S. J. (Engineering 1932–35.)
Squadron-Leader in R.A.F.—Awarded D.F.C. Killed on active service in Middle East, October 1942.

Morgan, C. H. (Arts 1931–35.)
Captain, East Surrey Regt.—Killed in action, 1942.

Noblston, R. M. (Engineering 1925–28.)
Flight-Lieut. in R.A.F.—Killed on active service (information dated February 1942).

Northwood, G. K. (Science 1938–39.)
Second Lieut., 53rd Battn. Reconnaissance Corps.—Killed in accident during exercises with unit, 13th May, 1941.

Petrie, M. A. (Arts 1936–39.)
Died on active service in Kenya (information dated 1st March, 1941).

Phillips, W. (Medical Sciences 1932–35.)
Surg.-Lieut. in R.N.V.R.—Reported missing, presumed killed, 8th August, 1942.

Redgrove, B. E. (Science 1933–36; Engineering 1936–38.)
Sergeant Pilot in R.A.F.V.R.—Killed in flying accident, November 1940. [Flew over Berlin, the Ruhr, invasion ports, etc., and dropped first bomb on L'Orient.]

Reuben, H. S. (Engineering 1937–40.)
Joined R.E. (Sapper).—Died on active service.

Scott, W. J. (Slade School 1937–39.)
Officer-Cadet in 165th O.C.T.U., Dunbar, June 1940.—Died on active service in India, 17th July, 1942.

Shaw, R. (Science 1937–39.)
Leading Aircraftman, training for Air Observer, June 1940.—Killed in action, August 1941.

Sheen, H. W. (Science 1936–39.)
Air Observer.—Killed in action, June 1942.

Staley, B. (Arts 1917.)
Lieut. in East Surrey Regt.—Died on active service, 1942.

Standfast, P. H. (Science 1931–34.)
Pilot Officer in R.A.F.—Reported (March 1942) as officially believed killed, August 1941, in successful attack on enemy shipping at Benghazi.

Sutton, A. P. B. G. (Architecture 1935–39.)
Flying Officer in R.A.F.V.R.—Died of wounds, 1942.

West, P. R. (Arts 1937–39.)
Killed, 18th September, 1941, while training as Pilot with R.A.F.

Wilkinson-Bell, J. W. B. (formerly Mitchell). (Engineering 1933–38.)
Pilot Officer in R.A.F., July 1940.—Reported missing (believed killed), July 1940.

Wills, G. E. L. (Arts 1924–29.)
Lieut. in R.A.—Died (information dated February 1942).

Windsor, B. A. M. (Science 1928–35.)
Joined Army, promoted to Major, served at Tobruk.—Believed drowned, December 1941.

Wounded, Missing, or Prisoner of War.

Armstrong, R. G. (Engineering 1931–35.)
R.C.S.—Taken prisoner when Belgians capitulated.

Chappell, R. (Administrative Staff, Accounts Assistant.)
Second-Lieut. Cambridgeshire Regt.—Reported missing in Malaya; later reported prisoner.

Dick, O. H. J. (Arts 1935–39.)
Prisoner of War in Germany, 1942.

Hilton, R. (Slade School 1929–31 and 1934–36.)
Joined Army.—Reported missing after Dieppe raid, August 1942; reported prisoner, November 1942.

Kane, G. J. (Arts 1938–39.)
? Rifle Brigade.—At Calais, reported prisoner (August 1940); wounded but recovered (November 1940).

Lennon, J. D. (Architecture 1935–39.)
Commission in R.E., April 1940. Proceeded to France, May 1940, with 51st Div. at St. Valery.—Captured June 1940, but escaped at Lille when en route for Germany, reached Marseilles and, eventually, Spain.

Lishmund, R. E. J. (Science 1934–39.)
Second Lieut. in Green Howards.—Taken prisoner in Libya, June 1942.

Nunn, J. L. (Science 1937–39.)
Flight-Lieut. in R.A.F.—Reported missing in action, October 1941; reported prisoner in Germany.

Petrie, J. F. (Science 1923–29; Arts 1929–31.)
Second Lieut. in 2nd Battn. The Wiltshire Regt.—Captured at Dunkirk, 25th May, 1940.

Walker, B. S. (Arts 1936–39.)
Second Lieut. in Durham Light Infantry, with B.E.F. in France, June 1940.—Wounded during retreat from Dunkirk and captured in hospital. Prisoner in Germany, September 1940 (recovered from wound); last heard of at Stalag. XXI D Posen.

Honours Awarded (Active Service or Civil Defence).

Bathfield, Dr. C. André. (Medical Sciences 1928–31.)
George Medal.

Cowman, J. (Arts 1936–39.)
Sergeant-Pilot in R.A.F. M.B.E., May 1942.

Denny, J. O. K. (Science 1932–36.)
Lieut. in Royal Horse Artillery. Captain (G.H.Q., M.E.F.), November 1942. M.C., February 1942.

Duke-Woolley, H. B. (Architecture 1929–34; Slade School 1938–39.)
Flying-Officer in R.A.F.V.R. D.F.C., October 1941.
Dyson, N. K. (Engineering 1928–32.)
Acting Flight-Lieut. R.A.F.V.R. M.B.E., June 1942.
Friend, P. D. (Science 1936–38.)
George Medal, 1941.
Hawksley, Joseph. (Engineering 1908–11.)
Major: Engineer and Manager, Southampton Waterworks. O.B.E. for services to Civil Defence, June 1941.
Hill, R. M., M.C., A.F.C. (Fellow.)
A./Air-Marshal. C.B., 1941.
King, W. B. R. (Yates-Goldsmid Professor of Geology.)
Major. M.C., 1940.
Larsen, H. W. (Economics 1939–40.)
Joined R.N.V.R.; Sub-Lieut. in anti-submarine trawler, August 1940. M.B.E.
Livingston, P. C. (Medical Sciences 1927–29.)
Consultant in Ophthalmology to R.A.F. A.F.C., June 1942.
Maynard, F. H. M., A.F.C. (Engineering 1911–14.)
A./Air Vice-Marshal. C.B. (May 1941) for distinguished service as Air-Officer Commanding R.A.F., Mediterranean.
Silvester, H. G. (Medical Sciences 1928–31.)
Surg.-Lieut. in R.N. O.B.E. (Military Div.) for "undaunted courage, steadfastness and resource in saving ships and life at sea in the face of peril and adversity." February 1941.
Veale, P. N. (Engineering 1933–35.)
Major in R.I.R. M.C. for distinguished services in Egypt, 1942.
Walden, L. (Laboratory Attendant, Dept. of Physics.)
George Medal, 1941.

OBITUARY.

(See also pages 17–20.)

The Rt. Hon. Lord Loch,
Joint Treasurer of the College.

In a year of heavy bereavement for the College, the College Committee has suffered an intimate loss by the death of one of their outstanding members, Major-General the Rt. Hon. Lord Loch, C.B., C.M.G., M.V.O., D.S.O., Joint Treasurer of the College and, since 1938, Chairman of the Budget Sub-Committee, which occurred on August 14th, 1942.

A man of wise judgment, gained from a varied experience of public work, he did all in his power to assist the solution of the many problems, financial and otherwise, which have lately come before the Committee, more particularly during the recent War years. His infectious high spirits and his soldierly straightforward manner of expressing his views were not the least of the qualities which endeared him to his colleagues and won their confidence.

At a meeting held on October 29th, 1942, the College Committee paid the following tribute to his memory :—

> The death of Lord Loch, Joint Treasurer of the College, has come at a time when the College, already sorely stricken, needed his advice as never before.
>
> Lord Loch's first association with the College was in October 1925 as Deputy Chairman of the Centenary Appeal Committee, and he became a member of the College Committee in December 1925. In 1926, in company with Dr. Seton, he visited the United States. The object of this visit was to make preparations in connection with the Centenary Appeal, rather than to seek immediate results. The foundations were well laid and resulted eventually in the Rockefeller endowment of the Department of Pharmacology and of the Department of Zoology and Comparative Anatomy. The visit also led to the endowment by the Commonwealth Fund of the Chair of American History. The College owed him a debt of gratitude for his work on this occasion.
>
> He was appointed Joint Treasurer in 1929, and, both in that capacity and later as Chairman of the Budget Sub-Committee, rendered sterling service.
>
> His sense of duty and wide knowledge of men made him an invaluable member of the College Committee, especially in matters relating to students, and, until laid low by illness, he never spared himself in giving service to the College.
>
> The College Committee record with sorrow the passing of a gallant and devoted member, and offer to Lady Loch and the family their deepest sympathy in this great bereavement.

The College was represented at the Funeral Service in the Guards' Chapel on August 20th by the Vice-Chairman (Lord Meston) and Mr. A. Digby Besant, Lord Loch's co-Treasurer.

Sir William Henry Bragg.

The College had a personal share in the loss occasioned to the world of Science by the death, on 12th March, 1942, of Sir William Henry Bragg, O.M., K.B.E., Past-President of the Royal Society.

His appointment to the Quain Chair of Physics, in succession to the late Professor F. T. Trouton, was made in 1915. His fame may be described as at its zenith at the time, for it was in the year of his appointment that the Nobel Prize was awarded to him jointly with his distinguished son, (Sir) W. Lawrence Bragg, for their revolutionising work (carried out while the father was Cavendish Professor at the University of Leeds), on which was founded the new science of X-ray analysis of crystal structure. The prior claims of the Great War interrupted his work at the College soon

after it was begun, and the Senate granted him leave of absence over a considerable period to enable him to serve H.M. Admiralty in the anti-submarine campaign, more particularly in the matter of submarine detection. When he was able to return to the College, he resumed his work on crystal analysis, and research workers came from many countries to work under him in the Physics laboratories.

In 1923 he resigned from the Quain Chair in order to become Director of the Royal Institution of Great Britain, Fullerian Professor of Chemistry and Director of the Davy-Faraday Research Laboratory. The connection of such a man with the College cannot be measured in terms of years. Sir William Bragg's work and influence added a memorable chapter to the annals of an already famous department and his personality secured for him a lasting place in the affection and esteem of his colleagues and students.

Among the many honours and distinctions which were awarded to him, both at home and abroad, was that of his admission to the small company of Honorary Doctors of Science of the University of London.

Professor E. J. Salisbury, a former colleague, represented the College at the Memorial Service at Westminster Abbey on 19th March, 1942.

Professor Emeritus Raymond Wilson Chambers.

The death, on St. George's Day (23rd April), 1942, of Professor Emeritus Raymond Wilson Chambers has left a sad gap in the front rank of the College personnel, and has brought a sense of irreparable loss to the large circle of his friends.

In a very definite sense, his life was spent in and for the College and University. He entered as a student in 1891, when barely seventeen years of age, graduated B.A. in 1894, took his M.A. in 1902, and his D.Lit. in 1912. In 1899 he joined the staff of the Department of English as Quain Student and, like many of his fellows in the Studentship, soon attained to high academic status. By 1904 he had, at the age of 29, become Assistant Professor. In 1915 the Senate conferred upon him the title of Reader and, on the retirement in 1922 of his illustrious chief, W. P. Ker, he was appointed to the Quain Chair of English Language and Literature. On his retirement under the age-limit, in 1941, he was invited to act as Special Lecturer. Although anxious to devote the energies of his later years to the literary work which he had so much at heart, the call of the College in its time of special need was one he could not fail to heed, and so he died in harness. He received the title of Professor Emeritus in 1942.

From 1901 until he became Professor, in 1922, he held the office of Librarian of the College concurrently with his academic posts. His fine scholarship and conscientious service made his tenure of the office memorable, and the part he played in bringing the Library

to its present high position in the University and among the Special Libraries of the country has placed the College deeply in his debt for all time. It is indeed fitting that the memorial to him, for which a fund has been opened with the present Librarian, Mr. John Wilks, as Treasurer, should have as its object the equipment of the English Library as a "Chambers Library of English" and the formation of a fund for the enriching of that Library with rare and valuable books such as he himself loved.

He was elected a Fellow of the College in 1900.

Chambers' life and work at the College, extending over a span of more than 50 years (1891–1942), may thus be briefly summarised. It is more difficult to appraise adequately his influence on its policy and outlook. There were few aspects of College life which did not feel that influence, for his interest in its welfare was unlimited and his broad humanity penetrated into many spheres of activity. As an instance of his wide sympathies may be mentioned his stalwart support of the St. Christopher's Working Boys' Club, which for so many years provided the students with an outlet for social work in the neighbourhood of the College and which ultimately became affiliated to the Union Societies. His annual appeals on behalf of the Club were largely instrumental in finding the necessary funds for carrying on its work. Every member of the College, in however junior or humble a connection, had a claim upon his friendly help. His students' after-careers were of continued interest to him, and his joy in the success they achieved had a very personal element. To many of them he had become a lifelong friend.

One of his many labours of love was the preparation, when Librarian, of the War Memorial Album of the College. This involved an untold amount of work in the careful sifting of a great mass of material to obtain the academic and War records of the 296 members of the College and Medical School who fell in the Great War of 1914–18. To Chambers it was a sacred task, and no one could have executed it with greater reverence. Where possible, photographs were secured. The two completed volumes form a record for all time of the College Roll of Honour and are a priceless possession. Ineligible himself for military service, it was Chambers' pride to serve as a hospital orderly in France, his only fear when under German bombardment from the air being, in the words of a tribute by Professor Sisson, "lest his inadequate strength should shake, or let fall, the precious wounded."

Chambers regarded himself in the light of a custodian of great traditions. He was so impressed by the stature of the men who had gone before him that he was probably unaware of the stature to which in the course of the years he had himself attained. He left a great School of English not only as strong as when he had first received it into his keeping, but with the added impress of

his own genius upon it. At the time of his retirement from the Quain Chair, at the end of 1940–41, a resolution of the Professorial Board (quoted in the last Annual Report) referred to the "Chambers tradition"; this was a very real and potent force. It gave the sense of continuity that is so essential to the full life of a great educational foundation, which by its very nature has a shifting population of short generations of students.

One of his many outstanding qualities was his rich enjoyment of a whimsical story, and he had an astonishing aptness for drawing upon his stock of humour when, as often happened, he acted as College spokesman on public or social occasions. His speeches were invariably lightened by flashes of wit and, consequently, were never dull.

His standing as a man of Letters can only be briefly touched upon here. His literary output has contributed masterpieces to the English Classics. His "England before the Norman Conquest" and "Man's Unconquerable Mind," his work on *Beowulf*, which won for him in 1928 the Biennial Prize for English Studies awarded by the British Academy, are examples of rare scholarship. His name will, however, be more widely associated with the subject of his later studies, Sir Thomas More. His biography of More, issued in 1935, created great interest at the time of its publication, and is accepted as a masterly contribution to English Literature, even by those who differ from the author's viewpoint. It gained the James Tait Black Memorial Book Prize "for the best biography or literary work of that nature issued in the year of award." Tyndale and the Venerable Bede also received sympathetic and masterly treatment by him.

His standing in the world of Letters and his high reputation as a lecturer brought him many invitations from outside bodies. He was Clark Lecturer at Trinity College, Cambridge, in 1935–36; in 1936 he delivered before the British Academy the Annual Lecture on a Master Mind, with "Bede" as his subject, and in 1937 the Annual Shakespeare Lecture of the same body on "The Jacobean Shakespeare and *Measure for Measure*"; in 1939 he was invited to give the first W. P. Ker Memorial Lecture at the University of Glasgow, choosing "King Lear" for that occasion. A unique compliment was paid to him by the Authorities of the Huntington Library of California when they invited him to make a report on their *Piers Plowman* manuscript. He paid two visits to the United States in response to that invitation, getting much enjoyment and refreshment from his travels.

In addition to the honours which he had won within his own University, he held the Honorary Degree of Doctor of Letters of the Universities of Durham and Leeds, was a Fellow and Member of Council of the British Academy, and, before the War, a Corresponding Member of the Bavarian Academy of Science. He had

taken an active part in the work of the Early English Text Society and was its Honorary Director at the time of his death, giving to its affairs the same conscientious attention which had characterised all his undertakings.

The ill-fate which had befallen the College buildings through enemy action, and the dispersal of its activities, had preyed greatly on Chambers' spirits, and his friends noted with concern an apparent undermining of his health, though he had left his London home and settled down in Aberystwyth with a cheerful determination to bear without complaint his share in the general misfortune. But he took every opportunity of visiting the injured buildings, and made it his concern to advise on the safeguarding of their treasures. The story of his last piece of service to his beloved institution, and how his end came in the performance of it, is well known to many readers of this Report. It can best be retold in the words of a resolution adopted by the College Committee at a meeting held on 30th April, 1942 :—

> That the College Committee has heard with deep regret of the death of Professor R. W. Chambers, and it desires to tender its very sincere sympathy to Miss Chambers in the great loss which has befallen her. As recently as September 1941 the College Committee and the Professorial Board on the occasion of the retirement of Professor Chambers from the Quain Chair of English Language and Literature endeavoured to express its appreciation of all that he had done alike for English Studies and for University College during more than 43 years spent in its service.
>
> It would be idle to attempt to reinforce these words. When Professor Chambers retired, he and we were hoping that he might be spared to complete some of the scholarly tasks at which he had laboured so devotedly and longed so to fulfil. But it was not to be. Instead, the last few months of his life were spent very specially in the service of the College that he had loved so long and so well. The exigencies of war had meant the growth of a generation of students who were in danger of losing touch with the life and ideals of the College as Professor Chambers had known it throughout a life spent within its walls. With loving care he had prepared a series of addresses which he delivered to our students in evacuation, bringing before them in his own inimitable fashion the life of the College in the great days of Ramsay, Housman, Ker, and Rose Bradford. He spoke of those things to our students in Aberystwyth ; he spoke of them to our students at Bangor. When he was already far from well he went with brave unselfishness to talk on the same theme to our Engineers at Swansea. The effort was too great ; the journey brought on his fatal illness, and he died as he had lived in the service of the College, an example and an inspiration to us all.

His death took place at a Swansea Nursing Home and was followed by cremation at Pontypridd, when the late Provost, Sir Allen Mawer, was present. Subsequently, a Memorial Service at Aberystwyth was attended by members of the College at that centre, as well as representatives of other centres, and the ashes were interred in Aberystwyth Cemetery. It seemed singularly fitting that one who had valued so highly his heritage as an Englishman should pass away on St. George's Day.

Professor Emeritus (John) Norman Collie.

With the death, on 1st November, 1942, of Professor Emeritus (John) Norman Collie, D.Sc., F.R.S., there passed away another of the great figures in the history of the College. On his retirement in 1928, the Provost of that time (the late Sir Gregory Foster) described him most fittingly as one of " the pillars of our house."

His long career in the College dated back to 1887, an outstanding date in the Department of Chemistry, for it brought William Ramsay as Alexander Williamson's successor in the Chair and Collie as a member of his staff with the title of Assistant. In the course of three years Collie was promoted to the rank of Assistant Professor, which he held until he left the College in 1896 to occupy the Chair of Chemistry at the Pharmaceutical Society. In 1902, a Chair of Organic Chemistry was established as distinct from that of General and Inorganic Chemistry, and Collie, now a Fellow of the Royal Society, returned as Professor. The notable partnership of Ramsay and Collie continued until the former's resignation in 1913. It was a time of what may be termed historic research, bringing an ever-widening fame to the old, ill-housed laboratories in the North end of the main building and attracting students from many countries, some of whom have themselves become famous chemists.

On Ramsay's departure, Collie succeeded him as Director of the Laboratories, and in that connection the following statement was made by the late Sir George Thane in the course of a Dean's Report presented at the Assembly of the College Faculties on 2nd July, 1913 :—

> " Sir William Ramsay's successor as Director of the Chemical Laboratories is Professor Norman Collie. I cannot record that appointment without referring to the remarkable series of investigations that Professor Collie, in conjunction with Mr. [Hubert S.] Patterson, has made and brought to a successful issue during the session. Professor Collie and Mr. Patterson have investigated the effects produced on gases at low pressures by high potential electric discharges. As a result of these investigations, it is now established that Neon and Helium can be obtained when the electrical discharge passes through Hydrogen under suitable conditions. Other products of a hitherto unknown character are also obtained.

> These startling results appear to indicate either a synthesis or a transmutation of elements, or it may be both combined. It is no over-statement to say that this will prove to be one of the greatest discoveries ever made in Chemistry, and will possibly lead to a solution of the fundamental problem of Chemical Science, namely, the nature and relationships of the elements. It is a source of great gratification to all connected with University College that the new Director of the Chemical Laboratories has thus maintained the high tradition of pioneer discovery associated with the Chemical Department of the College. Professor Collie has been ably assisted in this work by Mr. Irvine Masson. . . . We all unite most heartily in offering Professor Collie and his collaborators our sincerest congratulations, and it is a pleasure to record in this connection that the Royal Society of Edinburgh has conferred upon Professor Collie the Gunning Victoria Jubilee Prize ' for distinguished contributions to Chemistry, Organic and Inorganic, including work upon Neon and other rare Gases ' ; and that he will also receive the Honorary Doctor of Science Degree of Liverpool and of Belfast."

Soon after that statement was made, the present modern Chemistry Laboratories were erected as a new block of the College buildings and were opened in 1915. Collie, who now had F. G. Donnan as his co-Professor in Ramsay's Chair, had given invaluable assistance in the planning of these new laboratories and continued as their Director until his retirement. It is a satisfaction to the College Committee to know that he thus spent thirteen years of his professorship in such worthy surroundings. He was the Centenary historian of his department, and his *Century of Chemistry at University College*, 1927, is an important record of scientific progress.

When he retired, in 1928, the Senate conferred on him the title of Professor Emeritus, and he was in the first small group of men elected to the Honorary Fellowship of the College, instituted in that year.

Of a naturally shy disposition, with an instinctive distaste for public occasions, Collie never took a leading part in the social life of the College, but he did not shirk his responsibilities as a senior member of an academic community. He served his colleagues well as Honorary Treasurer and wine connoisseur of the Professors' Dining Club, and his was a familiar figure at the High Table of the Refectory. He did not absent himself from boards and committees, though he rarely took part in their discussions. When he did speak, his words carried weight.

No record of him, however incomplete, should omit a reference to his prowess as a mountaineer. As an antidote to the close work in the laboratory, the call of the wild had a strong appeal for his

pioneer spirit, and his vacations took him far afield among the high places of the world. Some of his adventures are preserved in *Climbing on the Himalaya*, published in 1902, and *Climbs and Exploration in the Canadian Rockies*, issued in the following year in collaboration with Mr. H. E. M. Stutfield. He was President of the Alpine Club in 1922–3 and Vice-President of the Geographical Society in 1924. He was also a noted fisherman. Nor does this exhaust the varied interests which went to make up such a man of parts. Painting in water-colours, colour-photography, Elizabethan literature and the collection of Chinese art treasures were among his hobbies and in each of them he had expert knowledge.

On his retirement, the College Committee, at the instance of the Professorial Board, invited him to accept appointment as an Honorary Lecturer and granted him the use of a research laboratory, but his appearances in Gower Street became more and more infrequent, until he retreated almost completely among his beloved Coolins in the Isle of Skye, where he died. He leaves behind him the record of a great man.

Mr. Nicholas Eumorfopoulos.

It will be seen from this Report that the past twelve months has been a period of grievous loss of outstanding personalities in the intimate life of the College. Nicholas Eumorfopoulos, who died on 9th December, 1942, had his own special place among these, a place so unique that there could be no attempt to fill it.

"Eumo," as he was affectionately called, belonged to a Greek family resident in England. He received the education of an English boy at University College School, then housed in Gower Street; his introduction to the College buildings, which were to become so familiar to him in his later years, was therefore made at a tender age. In 1889 he passed into the College as a student, graduating B.Sc. in 1892. He remained a student for two post-graduate years until, in 1894, he joined the staff of the Department of Physics as a Demonstrator, later becoming Assistant and finally Honorary Research Assistant, a position he retained until the time of his death. In 1900 he was elected a Fellow of the College.

Although a teacher of the College, and a valued member of his department, for forty-eight years, it is not in that connection that his outstanding service will be chiefly remembered. Inheriting strong business instincts, he found his real *métier* in dealing with the complicated affairs of several branches of College life, and the value of his work in securing the smooth conduct of their finances cannot be over-estimated. In 1912 he became Honorary Treasurer of the Union Society, and continued in the office until his death. Prior to 1912, the Treasurership had been passed from hand to hand, seldom remaining with one person for more

than three years. "Eumo" brought it into a settled and continuing system and had all its intricacies registered in his own memory. His connection with the Union became very intimate as his interest in its activities deepened. His was one of the most familiar figures at the Annual Athletic Sports, and he was a keen supporter of that side of student life. The Eumorfopoulos Cup for the comparatively new Squash Club is one of many instances of his private generosity, and it was he who was invited to perform the opening ceremony, on 17th October, 1935, of the new Squash Racquets and Badminton Courts, with adjoining rooms for the Presidents of the two Union Societies. In recording the successful negotiations for the sale of the Perivale Athletic Grounds and the purchase of new Grounds at Shenley, Herts, the College Committee made the following statement (Annual Report, February 1939, p. 93) :—

> Reference has been made . . . . . to the sympathetic support and practical help given by the late Dr. F. W. Goodbody in all matters pertaining to the Athletic Grounds. The record would not be complete unless the name of Mr. N. Eumorfopoulos, Trustee and Honorary Treasurer of the Men's Athletic Ground, were associated with his in this connection. Happily, the need does not arise for a recapitulation of his remarkable services to the student body as a whole, and to the Union Society in particular, for he is still in the midst of those activities. Without his lively interest, his wisdom, his experience, and his untiring devotion it is not likely that such a satisfactory solution of the Athletic Ground problem could have been reached.

In 1939, on the completion of fifty years of his connection with the College, the Union Societies, the Old Students' Association and the Hospital combined in raising a fund to commemorate his work for the students by the erection of ornamental gates to the new Athletic Ground, the "Eumo" Gates. The project has only been deferred by the War.

University College Hall, Ealing, was also one of his active interests.

His relations with the Union Society were of the happiest, and the barrier of the years seemed hardly to exist. His dual position of teacher and Union official made him a valuable liaison officer between the two bodies. It also brought him into personal contact with the College Servants as a body, and he was always a welcome guest at their social gatherings and outings.

Despite the increasing volume of his Union Society work, which made growing demands on his time, he found it possible to render similar service in other directions. He was Honorary Treasurer of the Professors' Dining Club and the Old Students' Association (of which he was a Past President). His was a remarkable example

of generous, businesslike service rendered ungrudgingly over a long period of years on an entirely honorary basis. No one has laboured for the College more devotedly than he, nor earned more faithfully the love and gratitude of its members.

Like others whose roots went deep into the past history of the College, its traditions were sacred to him, and its War injuries and enforced evacuation caused him great sorrow. So long as his health permitted, he continued to pay regular visits to the deserted buildings, where he would work on his salvaged records and sometimes meet friends.

Although his lot had been cast in England, he retained a strong affection for the land of his fathers and played his part in fostering friendship between the two countries. He was one of the founders of the Anglo-Hellenic League.

At the Funeral Service held on 12th December at the Greek Cathedral, Bayswater, the College was represented by the Acting-Provost (Mr. E. L. Tanner), Professor H. O. Corfiato, and members of the Union Society.

Dr. Elsie Vaughan Hitchcock.

News of the untimely death of Dr. Elsie Vaughan Hitchcock, through a fall at her wartime home at Aberystwyth, on 6th September, 1942, was received with the deepest regret by the large circle of her College friends. From the time she entered as a student, in 1905, she had given to the College her warmest devotion and had delighted to serve it. A resident at College Hall, then in Byng Place, she had taken so kindly to an academic atmosphere that it seemed the right setting for her life's career. Shortly after her graduation in 1908 she had a breakdown in health with a prolonged period of convalescence in South Africa. This constituted her only separation from the College, for as soon as circumstances permitted she returned to work personally for her revered Professor, W. P. Ker. Later she became a member of the staff of the Library and did valuable work on the catalogue, for which her special gift of painstaking, conscientious scholarship was so eminently suited. In 1920 she returned to her own Department of English as a Demonstrator, and remained a member of its staff until her death, rising through various stages of promotion to the status of Lecturer. It had been her intention to give up her teaching at the end of 1941–42, but her death forestalled the date of resignation, and she died, as it had been her pride to live, a teacher of the College. She, like many others who had been called upon to follow the College into exile, had felt the separation from Gower Street very keenly, but had carried on her work without complaint.

Dr. Hitchcock had a distinguished career as a student. She graduated with First Class Honours and later obtained two higher

degrees of the University—Doctor of Philosophy in 1924 and Doctor of Letters in 1929. Her first postgraduate study related to Reginald Pecock, 15th Century Bishop of St. Asaph, but later, under the inspiration of Professor Chambers, she turned her energies to Sir Thomas More. She edited Nicholas Harpsfield's 16th Century *Life* and collaborated with Professor Chambers in his great work on More. She had hoped to publish a study of yet another *Life*, which she left at an advanced stage. She was elected a Fellow of the College in 1926.

It had been her delight to assist the two Heads of her department to whom she herself owed so much, Professors W. P. Ker and R. W. Chambers, and to both she rendered eager service. The help she could give to Professor Chambers was necessarily more mature, and their association in literary work ripened into a rare friendship, which flourished on the solid ground of mutual scholarly interests and enthusiasms. She had made her home with Professor Chambers and his sister, Miss Chambers, upon whom a double bereavement has fallen within the short space of a few months. At the time of her death, Dr. Hitchcock was busily engaged in getting into order the various notes and papers left by Professor Chambers.

Dr. Hitchcock will be remembered at the College as one who, despite frail health, made her full contribution to its corporate life. Her rare gifts of sympathy and friendliness, and her kindly, unassuming manner brought her into close contact with her colleagues and students and made for her many lifelong friendships.

Professor Emeritus Michael Thomas Morley Ormsby.

The death, on 29th May, 1942, of Professor Emeritus M. T. M. Ormsby, M.Inst.C.E.I., severed an association with the College which had extended over a period of some forty-four years.

Professor Ormsby first joined the staff as an Assistant in Municipal Engineering under Professor Osbert Chadwick in 1898, a post which he held until 1912. During part of that time he was also Assistant for Surveying in the Department of Civil Engineering and Surveying under Professor Vernon-Harcourt and continued as Lecturer in Surveying after the retirement of that professor in 1905. In 1914, he received the title of Reader in Surveying, working in association with Professor E. R. Matthews, who was in that year appointed to the Chair of Municipal Engineering. In 1921, Professor Ormsby himself became Edwin Chadwick Professor of Municipal Engineering and Hygiene and occupied the Chair until 1936. The Senate granted him the title of Professor Emeritus on his retirement. It was characteristic of his unselfish and untiring service to the College that, although not in the best of health, he had postponed his retirement for one year in order to help over a difficult period in his Faculty, due to the many changes in the personnel which had recently occurred.

Professor Ormsby had seen many changes in Engineering at the

College. He had seen it emerge from the condition of a branch of Applied Science into Faculty status (1908–9), with the rapid development that followed, and he had seen the admission of the first women students to prepare for Engineering as a profession. His regular annual reports as professor testified to the part his department played in the steady growth in research and equipment, with the aid of grants from the Chadwick Trust. During his last years at College, he had the satisfaction of seeing two desires fulfilled : the establishment of a Constant Temperature Room and the re-arrangement of the programme of work to allow the undergraduate to spend more time in the laboratory. He will long be remembered by those generations of students who participated in his Summer Vacation Surveying Classes for practical work in country parts.

He leaves behind him a record of loyal service devoid of all self-seeking.

Professor Emeritus Sir (William Matthew) Flinders Petrie.

The death, in Jerusalem on 29th July, 1942, of the great Egyptologist, Sir W. M. Flinders Petrie, D.C.L., LL.D., D.Sc., F.B.A., F.R.S., at the age of 89, has removed from the College circle one who brought it much honour and who was held in peculiar veneration.

The Chair of Egyptology was founded under the Will of Miss Amelia B. Edwards in 1892, a library and a small collection of antiquities accompanying the benefaction. Fortunately for the College, W. F. Petrie, then a young man, had been engaged on exploration in Egypt for the Egypt Exploration Fund, of which Miss Edwards was an honorary secretary, and had shown such a remarkable flair for it that it was known to be the desire of the benefactress, although not specifically stated as a condition of the bequest, that he should be appointed the first occupant of the Chair. The appointment was accordingly made.

Petrie's tenure of the Edwards Chair continued for forty-one memorable years, during which period a world-famous department, a museum which ranks high in this country for the importance of many of its objects and provides an incomparable teaching collection, and a fine library, were built up by the genius of the professor. Further, the fundamentals of the Science of Archæology as known in the present day were first formulated by him, and his system of the sequence-dating of objects became the basis of archæological chronology. He was the founder of the British School of Archæology in Egypt, in the promotion of which Lady Petrie was actively identified with her husband.

An ever-growing band of enthusiasts of all ages worked in the department under Petrie's inspiring leadership, with Dr. Margaret Murray as Assistant Professor. Each winter, the work was carried out in the field, first in Egypt, later in Northern Syria and Palestine.

The scientific insight and accurate sense of probability, which were marked characteristics of Petrie, led to some rare discoveries. An exceptionally rapid worker, Petrie made it a rule that the material of each season's record should be prepared for publication before another season's work began. An exhibition of recent discoveries was held at the College each Summer and public lectures were delivered in the Autumn. Both of these events brought distinguished visitors to the College year by year. The annual accretions to the Collection were at first deposited in the College museum on loan, but the entire Collection was ultimately acquired by the College and remains a priceless possession as well as a memorial to a great professor. Petrie's catalogue of a large portion of it was a big task, which has enhanced its value as a teaching collection and is in itself a great contribution to archæological literature.

Of his long list of other literary work, the following call for special mention :—*Inductive Metrology*, which practically revolutionised archæology ; *Medum*, which introduced the study of the hieroglyphic signs ; *Tell el Amarna*, beyond which hardly any fresh facts of the period have been discovered ; *Naqada and Ballas*, dealing with the discovery of the Egyptian prehistoric period ; *Diospolis Parva*, introducing the important method of sequence-dating ; *Tell el Hesy*, completing the sequence of Palestinian pottery ; *Royal Tombs*, completing the early history of Egypt ; *The Pyramids and Temples of Gizeh*, *Methods and Aims in Archæology*, and *Revolutions of Civilisation*, the latter being deemed to be one of his greatest works.

He was, perhaps, the greatest authority on ancient, particularly Egyptian, weights and measures.

It does not come within the scope of this Report to make a complete record of the many honours conferred upon Petrie, but those concerned more intimately with the University and College may be aptly recalled. In 1925, a body of subscribers commemorated the completion of fifty years of his archæological work by establishing in the University a Petrie Medal for distinguished work in Archæology, and H.R.H. the late Prince Arthur of Connaught attended at the College on 7th July of that year to present to Petrie himself the first copy of the Medal. In 1933, the year of his retirement, the University admitted him to the small body of its Honorary Doctors of Science and conferred on him the title of Professor Emeritus. In the following year he was elected to the Honorary Fellowship of the College. On 23rd November, 1934, a special committee handed over to the College his portrait, specially painted for the purpose by the late Mr. Philip de Laszlo. For the rest, in the words of a resolution adopted by the Professorial Board and College Committee when he retired from the Chair, "The public and academic distinctions which he has received have brought high honour to the College in which he has worked for so many

years. Besides honorary doctorates from British and foreign universities, he has been knighted by His Majesty the King and is one of the very few men upon whom has been conferred the Fellowship alike of the Royal Society and the British Academy."

His singleness of purpose, his enthusiasm undimmed by age, his mental vigour, his austere manner of life, and his fine presence leave an ineffaceable impression on the minds of all who knew him. The College Committee is deeply conscious of its indebtedness to his genius and gladly pays this tribute to his memory.

Mr. P. Wilson Steer, O.M.

Mr. P. Wilson Steer, whose death occurred on 21st March, 1942, had a long and distinguished connection with the Slade School, extending from 1899 until 1930, first as Assistant and, from 1921, as Assistant Professor. Frederick Brown was Slade Professor when he first came to the College, but his name is especially associated with that of Henry Tonks, who had been his colleague throughout the whole period. It was on Tonks' retirement that Steer decided to retire also. He had then reached, or was approaching, the age of seventy, but his appointment was affected by no age-limit. Had he desired an excuse for earlier retirement from teaching, the position of eminence to which he had attained in the World of Art would have provided ample justification, but, most fortunately for the students who worked under his inspiration, he loved the work and was deeply attached to a School of free traditions, which he had himself so largely helped to establish.

The action of His Majesty King George the Fifth in conferring on Steer the rare honour of the Order of Merit in 1931 gave great pleasure to the many who held his name in high esteem, not only in the Slade School but throughout the College.

His last act of service to the Slade School was his participation, as a member of the Henry Tonks Memorial Committee, in the movement to commemorate the name of his old colleague and chief and, in so doing, to benefit the School which they had both served so faithfully.

The late Provost, Sir Allen Mawer, attended the Funeral Service on 25th March.

The College Committee also record with regret the death of the following persons who were connected with the College :—

Allen, Dr. Edgar Johnston, C.B.E., former Director of the Marine Biological Laboratory at Plymouth ; elected Fellow in 1938. [7th December, 1942.]

Amulree, The Rt. Hon. Lord ; Student 1883–4, Member of Old Students' Association. [5th May, 1942.]

Bewes, Mr. Wyndham Anstis, former Hon. Secretary of the International Law Association and the Grotius Society ; Student, 1875–78. [28th July, 1942.]

Buer, Dr. Mabel Craven, Independent Lecturer in Economics, University of Reading; Student 1908–10. [9th December, 1942.]

Burt, Sir Bryce Chudleigh, C.I.E., M.B.E., Indian Agricultural Service; Student 1900–2. [2nd January, 1943.]

Carr, Dr. John Walter, C.B.E., Past President of the Medical Society of London; Student 1879–82. [29th September, 1942.]

Davids, Dr. Caroline A. F. Rhys, former Lecturer on Pali Literature and Buddhist History, School of Oriental Studies, President and co-founder of the Pali Text Society; elected Fellow in 1896. [26th June, 1942.]

Jones, Mr. Stephen; former Superintendent of Phonetics Laboratory, member of Phonetics Staff 1913–37. [24th August, 1942.]

Lee, Miss Florence; elected Fellow in 1894. [18th August, 1942.]

Newton, Dr. Arthur Percival, Professor Emeritus, King's College, London; Lecturer in American and Colonial History 1914–19; Rhodes Lecturer 1916–19. [12th August, 1942.]

Richards, Dr. Harold Meredith, former Medical Officer, Ministry of Health; elected Fellow in 1898. [25th December, 1942.]

Robinson, Mr. Gerald Philip, Mezzotint Engraver to Their Majesties Queen Victoria and King Edward the Seventh, founder and president of the Society of Mezzotint Engravers; Student of the Slade School 1877. [21st November, 1942.]

Rodocanachi, Dr. Ambrose John; Student of the Faculty of Medicine 1891–95. [13th October, 1942.]

Schurman, Mr. Jacob Gould, former President of Cornell University, United States Ambassador to Germany 1925–30: Student 1875–78. [12th August, 1942.]

Senter, Dr. George, former Principal of Birkbeck College: Student 1899–1901. [14th March, 1942.]

Spurgeon, Dr. Caroline F. E., Professor Emeritus of the University, Hildred Carlisle Professor of English Literature and Head of the Department of English Literature, Bedford College, London, 1913–29; Student 1896–1906, Quain Essay Prizeman and Morley Medallist, 1898. [24th October, 1942.]

Tryon, Mr. Wyndham, Artist; Student of the Slade School 1906–11. [16th November, 1942.]

Tuckett, Dr. Ivor Lloyd; elected Fellow in 1902. [28th November, 1942.]

Willey, Dr. Arthur, Emeritus Professor of Zoology, McGill University; elected Fellow in 1912. [26th December, 1942.]

SANKEY,
Chairman.
